

Preziosa

RING METER

To make measuring the correct size easier, you can print this document and use our ring meter.

1. Print the document maintaining the proportions at the printing stage
2. In order to check that the proportions have been maintained after printing, the segment at the bottom of the sheet shall measure 5 cm the measurement with a ruler
3. Cut out the ring meter illustrated
4. Cut with a cutter the line shown on the ring meter
5. Wrap the meter on the finger you are trying to figure out the size, insert the tip end into the slit that you cut with the cutter
6. Tighten enough to wrap your finger well and check the circumference in mm
7. Compare the circumference measurement with the size chart and find out the right size for you
8. Match the size of the rings to the size of Preziosa (XXS - XL). They are indicated in the description of product in the product page

PREZIOSA USES ITALIAN SIZE SYSTEM

mm	mm	Sistema taglie	Sistema taglie
DIAMETRO	CIRCONFERENZA	ITALIA	FRANCIA

21,7	68	29	
21,9	68,8	30	68
22	69		
22,3	70		

GENERAL INFORMATION

1. Remember that the left and left hand are NOT the same, the hand we use most often is always slightly larger than the other
2. Preziosa generally makes 5/6 sizes per ring (except for adjustable rings that have less). Choose the size closest to your size, if you have any doubts contact us.
3. The fit of the ring changes depending on the height of the ring itself. The higher the ring is the smaller it dresses and vice versa. If you have any doubts contact us.
4. If you do not find the size you are looking for on our website, please contact us, we will let you know if we can make it for you
5. Summer and winter affect the size of our fingers, the heat makes them swell while the cold has the opposite effect. So it's normal if during the same ring you feel sometimes tighter, sometimes more abundant
